DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless —

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 10-13 are rejected under 35 U.S.C. 102(e) as being anticipated by Zeiter et al (6,269,671).

Zeiter et al teach a method and apparatus for forming shaped packaging, comprising a pin (6) having a body and a face portion, which has at least two contiguous frusto-conical portions (Fig. 10, a, b, c) having different apex angles (Fig. 10, x, y, z); a platen (8) bearing an indicia forming die (col. 5, lines 7-12) and means for advancing the pin toward the platen (col. 8, lines 61-67); wherein the pin face having a slightly concave surface (col. 3, lines 24-26); wherein the

pin body and the pin face comprises different materials having different friction parameters (col. 5, lines 26-60).

3. Claims 10 and 13 are rejected under 35 U.S.C. 102(b) as being anticipated by Zeiter et al (5,879,612).

Zeiter et al teach an apparatus and method for manufacturing shaped forms of packaging, comprising a pin (6) having a body (27-29) and a face (30-32) having an indicia thereon (col. 4, lines 27-35), wherein the body having at least two contiguous frusto-conical portions (30, 31) having different apex angles; a platen (1) bearing indicia forming die (8) corresponding with the pin (6), means for advancing the pin toward and in engagement with the platen (col. 8, lines 39-45); wherein the portion of the pin body and the pin face comprises different material having different friction parameters (col. 4, lines 45-67).
